PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with 1+ year of hands-on experience building end-to-end analytics solutions across Operations, HR, Healthcare, and Banking domains. Proficient in Power BI, Tableau, SQL, and Python (pandas) for data extraction, transformation, visualization, and reporting. Demonstrated ability to automate workflows using Power Automate and Power Query, reducing manual effort by 40%. Experienced in KPI development, exploratory data analysis (EDA), predictive modeling, anomaly detection, and dashboard development. Strong communicator with a track record of translating complex data into actionable business insights for cross-functional stakeholders. Certified in Microsoft Azure AI Fundamentals and SQL (Advanced) by HackerRank.

TECHNICAL SKILLS

Data Visualization: Power BI, Tableau, Microsoft Excel, PivotTables, Power Pivot

Databases: MySQL, SQL Server, ETL Pipelines, Data Modeling, Row-Level Security (RLS)

Automation & Tools: Power Automate, Power Query, Microsoft Azure, Excel (VLOOKUP, INDEX-MATCH)

Soft Skills: Data Storytelling, Stakeholder Reporting, Problem Solving, Cross-functional Collaboration

WORK EXPERIENCE

Data Analyst | GoMechanic, Hyderabad

March 2025 – December 2025

- Designed and deployed Power BI dashboards monitoring 10+ operational KPIs — including turnaround time, CSAT scores, and revenue trends — enabling data-driven decision-making across departments.
- Automated 10+ recurring MIS reports using Power Query and Power Automate, reducing manual reporting effort by 40% (~8 hours/week) and eliminating data entry errors.
- Wrote complex SQL queries (MySQL, SQL Server) to analyze large operational and customer datasets, identifying service bottlenecks and revenue leakage patterns that informed process improvements.
- Conducted trend analysis and variance analysis to identify performance gaps and support proactive corrective action by business teams.

Data Analyst Intern | AI Variant, Bangalore

June 2024 – December 2024

- Executed end-to-end data workflows covering data ingestion, cleaning, transformation, EDA, and visualization using Python (pandas), SQL, and Excel across large structured datasets.
- Improved dataset quality by 30% through validation checks, deduplication logic, and anomaly detection routines, ensuring reliable data for downstream reporting and modeling.
- Built interactive Power BI and Tableau dashboards to communicate complex insights to non-technical stakeholders, improving data literacy and reporting adoption across business units.

PROJECTS

HR Analytics – Employee Attrition and Retention | SQL, Power BI, Python, Microsoft Azure AI

- Processed 10,000+ employee records from HRMS systems using SQL-based segmentation, correlation analysis, and clustering to identify key attrition drivers including department, compensation, and engagement scores.
- Built predictive attrition dashboards in Power BI enabling HR teams to proactively identify at-risk employees and improve retention strategies, demonstrating large-scale workforce analytics capability.

Healthcare Analytics – Patient Outcomes and Operational Efficiency | SQL, Power BI

- Analyzed 50,000+ patient records to detect throughput bottlenecks in hospital discharge workflows, reducing average length of stay by 1.2 days through data-driven process optimization.
- Developed dynamic operational dashboards enabling real-time monitoring of hospital KPIs, improving management visibility into bottlenecks and resource allocation.

Bank Analytics – Credit Risk, Fraud Detection and Customer Intelligence | SQL, Power BI, Excel

- Analyzed customer transaction and loan performance data to build multi-dimensional KPI dashboards tracking CLV, delinquency rates, NPA ratio, and cross-sell opportunities.
- Applied anomaly detection techniques on spending behavior to flag fraudulent transactions, improving risk monitoring accuracy and supporting compliance reporting.

EDUCATION

Bachelor of Computer Applications (BCA)

The Oxford College of Science, Bangalore University | 2020 – 2023

CERTIFICATIONS

- Microsoft Azure AI Fundamentals – Microsoft
- SQL (Advanced) – HackerRank Verified
- Python Basic – HackerRank Verified
- Data Analyst Certification – ExcelR
